

ConnectCIC™ CLIPS™

Centrally Linked Information for Public Safety

Empowers law enforcement and criminal justice organizations with complete access to local, state, national, and international criminal and public record databases!

ConnectCIC™ CLIPS™, Version 1.0, is a robust, stand-alone, browser-based application providing access to all CJIS transactions supported by the state message switch.

CommSys understands that having affordable, reliable, convenient, and secure access to critical information such as CJIS records is vitally important for law enforcement and criminal justice organizations. ConnectCIC CLIPS is specifically designed to comply with state standards and requirements for full terminal access via the message switch. ConnectCIC CLIPS is also designed to assist agencies in affordably managing the ever-changing requirements brought about by heightened security issues, NCIC 2000 and state compliances, and necessary technology upgrades. ConnectCIC CLIPS also provides agency administrators with easy-to-use tools and processes to configure devices, users, permissions, and manage logs.

ConnectCIC CLIPS is designed for a browser-based client allowing users to capitalize on knowledge and skills they most likely possess, therefore, lessening training time while improving the efficiency and productivity of the users and adaptability of the application.

Caution and Medical Conditions (CMC)

Case Information

Last Contact Date (DLC) Originating Agency Case # (OCA)
Emancipation Date (DOE) Recovery Date (DOR)
Reporting Agency (ORA) Agency Phone # (APN)
Investigator's Name (INM)
Linkage Agency Identifier (LKI) Linkage Case # (LKA)
Notify Originating Agency? (NOA)
Report Category (CAT)

ConnectCIC CLIPS Features and Benefits

- **Full Support of All Transactions** – ConnectCIC CLIPS supports every transaction on the state message switch including access to all state systems (DMV, hot files, etc.) as well as NCIC, NLETS, and CPIC.
- **Intuitive User Interface** – ConnectCIC CLIPS is designed to maximize user productivity and efficiency. The user interface and navigation is intuitive from initiating a request to viewing a response to printing to response history searches to receipt of unsolicited messages. The application is designed to be a tool to aid users in doing their jobs as quickly and accurately.
- **Easy System Administration** – ConnectCIC CLIPS allows each agency to simply configure the application for their environment and personnel and make seamless adjustments as necessary. Whether you are dispatcher multi-tasking, conducting case research, or entering records, ConnectCIC CLIPS can be adapted to your environment.
- **Reduce Costs and Achieve a Quicker Return on Investment** -- CommSys offers scalable pricing by device licenses and even a site license. Annual maintenance and support plans include support and system upgrades for changes mandated by the state and/or NCIC as well as version upgrades to provide enhanced user and administrative functionality. We believe our product and support pricing will allow you to reach an ROI sooner than any vendor on the market today.

In summary, CommSys, while delivering cost savings and efficiencies to agencies and provides access to vital information users need to perform their jobs when and where needed; be it in dispatch, records, detective bureau, and even the mobile environment.

Minimum Requirements for ConnectCIC CLIPS

ConnectCIC CLIPS is not a processor intense application. If you are supporting ten or fewer devices you may be able to run this application on a server supporting other applications if the CPU utilization is less than 30% prior to ConnectCIC CLIPS being installed. However, we recommend that if you are supporting more than ten devices, you dedicate a server to this application.

Minimum requirement guidelines for hardware and 3rd-party software necessary to support up to a 10-device ConnectCIC CLIPS system are as follows:

- Pentium III 800 Mhz, 512 MB RAM, 7,200 RPM Disk, 40 GB hard drive, and CD-ROM (for software distribution)
- Windows 2000 Professional or XP (Professional Edition) Operating Systems with Internet Information Server (IIS); Windows 2003 Server is also an option
- MSDE 2000 (will be provided by CommSys) or SQL Server 2000 (optional, not provided by CommSys). Note: If use SQL 2000, OS should not be XP.
- Internet Explorer Version 6.0 (Server and Clients)

Please contact us for environments in which further clarification is needed.

About CommSys

Since 1989, CommSys, headquartered in Dayton, Ohio, and privately held, has developed and implemented technology solutions that provide public safety customers with a strategic asset for today's rapidly changing, intensely competitive business environment.

CommSys has over 13 years of experience in providing solutions and services for public safety software vendors and state, county, and municipal agencies across the nation. We have developed innovative solutions and have often provided cost-effective solutions when no other options seemed possible. Our goal is to provide you with the most reliable technology products, service, and information to help your business thrive.
